PROFESSIONAL PROFILE

Junior Full-Stack Developer. I built and shipped 3 corporate websites into production in 2026 for local businesses (a barbershop, an HVAC company, a 3D rendering studio), handling each one solo: design, code, SEO and deployment. I like automating repetitive tasks with n8n and using AI (OpenAI, Anthropic) where it actually saves time, not as decoration. Native Spanish and Slovak, C1 English and Czech.

REAL CLIENT PROJECTS (IN PRODUCTION, AS FREELANCER)

Magnum Barbershop & Tattoo — Corporate Website (2026)

- Problem: Lack of online presence and search visibility for a barbershop and tattoo studio in Puerto de la Cruz.
- Solution: Designed, built and deployed an ultra-fast website using Astro and Tailwind CSS. Implemented advanced local SEO (Schema.org LocalBusiness, Open Graph and canonical tags).
- Impact / Metrics: Configured DNS on Hostinger with continuous deployment on Vercel, achieving a 95+/100 Lighthouse score and strategically positioning the business in local searches.

Climatizaciones Dalai — Corporate Website (2026)

- Problem: Need for digital lead generation and service presentation for an HVAC company.
- Solution: Custom-built a full website with Astro and Tailwind CSS. Designed and integrated a secure contact form and rigorously optimized images for faster mobile load times.
- Impact / Metrics: Implemented an optimal on-page local SEO and DNS setup, delivering an autonomous lead-generation channel and a smooth user experience with instant page loads.

Rendex — Corporate Website (2026)

- Problem: Lack of a fast, interactive platform for a 3D rendering studio to showcase its high-resolution portfolio without hurting web performance.
- Solution: Built and published a production-ready, optimized corporate website using Astro and Tailwind CSS.
- Impact / Metrics: Managed end-to-end deployment on Vercel with optimized CDN and DNS setup on Hostinger. Implemented technical SEO and Open Graph, achieving proper indexing of heavy renders and enabling interactive, latency-free viewing.

KEY PERSONAL PROJECTS

SaaS-Presupuestos | Construction SaaS — github.com/Matusbh

- Description: Robust SaaS application built with TypeScript, designed to digitize and automate the full quoting workflow for a real family business in the construction sector.
- Technical Milestone: Handles everything from cost estimation to dynamic generation and automated delivery of formal PDF quotes to the end client, demonstrating TypeScript proficiency and a full-stack architecture built for real commercial use.

News-N8N | AI-Powered Smart News Aggregator — github.com/Matusbh

- Description: Automated real-time news collection and curation platform connecting an n8n automation flow with external APIs.
- Technical Milestone: Autonomously integrates the Anthropic and OpenAI APIs to dynamically process, categorize and synthesize collected articles based on topical relevance.

EDUCATION

Full-Stack Web Development Bootcamp — ConquerBlocks (2024 - 2026)

- Strategic Focus: Intensive, high-performance specialization focused exclusively on development and architecture with JavaScript/TypeScript full-stack ecosystem technologies (HTML5, CSS3, JavaScript ES6, React, Node.js, REST APIs, SQL and MongoDB databases).

TECHNICAL SKILLS

- Languages: JavaScript (ES6+), TypeScript, Python
- Frontend: React, Astro, Vite, Tailwind CSS, HTML5, CSS3
- Backend & APIs: Node.js, REST APIs, AI Integrations
- Databases: SQL (MySQL), NoSQL (MongoDB)
- Automation & AI: n8n, OpenAI API, Anthropic API
- Tools & Deployment: Git, GitHub, Vercel, Hostinger, Claude Code, Cursor

LANGUAGES

- Spanish: Native
- Slovak: Native
- Czech: C1 (Fluent)
- English: C1 (Fluent)
